ALAELDEEN ALBUSHRA OMER

Quality Control & Food Safety Officer | Food Microbiology Specialist

Makkah, Saudi Arabia | Phone: +966 59 172 3483 | Email: aladeen35@gmail.com
Nationality: Sudanese | Languages: Arabic (Native), English (Intermediate)

PROFESSIONAL SUMMARY

Food Science and Technology graduate with over three years of hands-on experience in quality control, food safety and food microbiology across catering, healthy-meal production and beverage service operations. Experienced in applying HACCP principles, ISO 22000:2018 and ISO 9001 requirements, microbiological testing, hygiene monitoring and supplier inspection. Strong record of standardizing processes, reducing waste and maintaining audit-ready documentation. Computer literate with proficiency in Microsoft Office, food safety applications and the practical use of artificial intelligence tools and prompt writing to speed up reporting and training tasks. Native Arabic speaker with intermediate English.

CORE COMPETENCIES

- Food safety management systems: HACCP, ISO 22000:2018, ISO 9001
- Quality control and quality assurance of raw materials, in-process and finished products
- Food microbiology: sampling, microbial culture, chromogenic media (CHROMagar), swabs and shelf-life checks
- Hygiene, sanitation, pest control awareness and correct use of cleaning chemicals
- Temperature control, cold chain monitoring and CCP verification
- Supplier and incoming goods inspection; storage and handling standards
- Recipe development, menu standardization and portion control for dietary and medical meals
- Inventory management, waste reduction and cost awareness
- Internal auditing, non-conformity reporting, corrective and preventive actions (CAPA)
- Staff training and coaching on food safety and personal hygiene (certified Train the Trainer)
- Documentation, record keeping and digital reporting
- Communication, negotiation, problem solving and teamwork under pressure

PROFESSIONAL EXPERIENCE

Quality Officer — Half Million (Beverage Services), Makkah, Saudi Arabia
May 2025 – Present

- Manage day-to-day quality control for beverage preparation, packaging and delivery, ensuring products reach the customer within the required quality and temperature standards.
- Monitor compliance with Saudi food safety regulations (SFDA) and internal HACCP-based procedures across branches.
- Conduct hygiene inspections, verify cleaning schedules and follow up on corrective actions with branch teams.
- Coordinate with operations, supply chain and customer service teams to resolve quality complaints and prevent recurrence.
- Maintain quality records, inspection reports and training documentation ready for internal and

external audits.

Quality Officer — Diet Center Company, Saudi Arabia

October 2024 – May 2025

- Developed and implemented recipes for daily healthy meals, dietary programs and specialized menus for sports clubs, hospitals and clients with special nutritional needs.
- Enforced strict quality standards throughout food production, handling, storage and distribution.
- Carried out routine inspections, temperature checks and microbiological sampling to verify product safety.
- Collaborated with cross-functional teams to optimize production flow, streamline inventory management and reduce food waste.
- Trained kitchen and packing staff on hygiene practices, allergen control and correct documentation.

Quality Officer — SHATIC Hotel and Tourism Services

March 2021 – September 2021

- Managed the production of meals and daily rations for remote work sites, ensuring timely delivery and consistent quality.
- Coordinated catering for weddings and large events, maintaining food quality, presentation and service standards for high-volume groups.
- Implemented quality control measures to monitor food safety and hygiene throughout production and service.
- Supervised storage conditions, stock rotation (FIFO) and supplier deliveries.

EDUCATION

Bachelor of Agriculture — Food Science and Technology

Al-Zaim Al-Azhari University, Khartoum Bahri, Sudan | 2014 – 2021

GPA: 3.0 / 4.0 — Second Class, Division One (Very Good)

TECHNICAL AND DIGITAL SKILLS

Computer Literacy

- Microsoft Office: Word, Excel, PowerPoint, Outlook — proficient (ICDL certified)
- Data entry, spreadsheets, charts and digital report preparation
- Email, internet research, cloud file sharing and online meeting platforms
- Food safety applications and digital checklists: HACCP logs, temperature and cleaning records

Artificial Intelligence in the Workplace

- Practical use of AI assistants (ChatGPT, Claude, Gemini, Copilot) to draft reports, summarize data, prepare SOPs, checklists and training material, and translate documents between Arabic and English.
- Prompt engineering and prompt writing: defining role and objective, providing context and constraints, specifying output format, using examples, and refining prompts iteratively to reach accurate results.
- Reviewing and verifying AI output before use, with awareness of data confidentiality and workplace policies.
- Using AI to accelerate routine documentation so more time is spent on inspection and field work.

Additional Technical Skills

- Laboratory techniques: media preparation, plating, incubation and result interpretation
- Graphic design, photography and content creation basics
- Certified drone operation

LANGUAGES

- Arabic: Native — speaking, reading, writing and professional correspondence
- English: Intermediate — technical vocabulary, reports, emails and daily workplace communication

CERTIFICATIONS AND TRAINING
